

Biosensors in Russia: Twenty years of research

Evtyugin G.

Kazan Federal University, 420008, Kremlevskaya 18, Kazan, Russia

Abstract

The main achievements of Russian researchers in the field of biosensors from 1991 till nowadays are considered. The biosensors are classified according to the nature of the biochemical component. The most important reviews of Russian scientists devoted to enzyme, microbe, immune, and DNA-sensors are revised together with the most interesting results acquired within the field. © 2011 Pleiades Publishing, Ltd.
